Subject Index

Methods and constructs

Theoretical

Computational methods for electronic structure

Understanding the solvatochromism of 10-hydroxybenzo[h]quinoline. An appraisal of a polarity calibrator, J. Carlos del Valle and J. Catalán 270 (2001) 1

Theoretical investigation of the role of π–π interactions for the stability of phenylene ethynylene aggregates, M. Pickholz and S. Stafström 270 (2001) 245

Electron densities for the outer valence orbitals of pyridine: comparison of EMS measurements with near Hartree–Fock limit and density functional theory calculations, S. Tixier, W.A. Shapley, Y. Zheng, D.P. Chong, C.E. Brion, Z. Shi and S. Wolfe 270 (2001) 263

An investigation of keto–enol tautomerism in *N*-vinyl-2-, and 3-pyrrolidinones using ab initio and density functional theory calculations, H. Yekeler 270 (2001) 391

-CI and valence bond approach

Imaging of orbital electron densities by electron momentum spectroscopy – a chemical interpretation of the binary (e,2e) reaction, C.E. Brion, G. Cooper, Y. Zheng, I.V. Litvinyuk and I.E. McCarthy 270 (2001) 13

On the size extensivity of second-order Møller–Plesset perturbation theory based on a perfectly-paired generalized valence bond reference wavefunction, M. Sejpal and R.P. Messmer 270 (2001) 237

-perturbative and many body approaches

Rapid estimation of the electronic correlation energies for van der Waals complexes, J. Wei, S. Zhuo and G. Ju 270 (2001) 31

Second-order Møller–Plesset perturbation theory for computing molecular-field splitting: application to the $S2p_{3/2}$ level in $C_2H_{2n+1}SF_5$, $n = 0$, 1, and 2, T. Karlsen, K.J. Børve and L.J. Sæthre 270 (2001) 55

On the size extensivity of second-order Møller–Plesset perturbation theory based on a perfectly-paired generalized valence bond reference wavefunction, M. Sejpal and R.P. Messmer 270 (2001) 237

PII: S0301-0104(01)00436-0

Theoretical investigation of the role of π–π interactions for the stability of phenylene ethynylene aggregates, M. Pickholz and S. Stafström 270 (2001) 245

-density functional theory

Imaging of orbital electron densities by electron momentum spectroscopy – a chemical interpretation of the binary (e,2e) reaction, C.E. Brion, G. Cooper, Y. Zheng, I.V. Litvinyuk and I.E. McCarthy 270 (2001) 13

Excited electronic states and effect of vibronic-spin–orbit coupling on the radiative deactivation of the lowest triplet states of dioxins, E.A. Gastilovich, V.G. Klimenko, N.V. Korol'kova and G. Rauhut 270 (2001) 41

Tautomerism, hydrogen bonding and vibrational properties of 4-acetyl-3(5)-amino-5(3)-methylpyrazole, A. Szabó, V.I. Češljević and A. Kovács 270 (2001) 67

On the structure and spectroscopic properties of free and protonated adamanzanes, V. Galasso 270 (2001) 79

"Plasma" effect in the formation of long lifetime Rydberg states, X. Hua, J. Bai and L. Wang 270 (2001) 93

Theoretical investigation on $BaTiO_3$ with periodic density functional theory BLYP method, Z.-X. Chen, C.-G. Liu, Y. Chen and Y.-S. Jiang 270 (2001) 253

An investigation of keto–enol tautomerism in *N*-vinyl-2-, and 3-pyrrolidinones using ab initio and density functional theory calculations, H. Yekeler 270 (2001) 391

Sulfur in different chemical surroundings – S K XANES spectra of sulfur-containing heterocycles and their quantum-chemically supported interpretation, B. Flemmig, H. Modrow, K.H. Hallmeier, J. Hormes, J. Reinhold and R. Szargan 270 (2001) 405

Semiempirical methods

Excited electronic states and effect of vibronic-spin–orbit coupling on the radiative deactivation of the lowest triplet states of dioxins, E.A. Gastilovich, V.G. Klimenko, N.V. Korol'kova and G. Rauhut 270 (2001) 41

Bifluorophors: molecular design and excitation energy transfer mechanism, I.A. Ronova, A.Yu. Kovalevsky, S.A. Siling, S.V. Shamshin, A.V. Grachev and O.Yu. Tsyganova 270 (2001) 99

Structure and vibrational spectroscopy of halide ion hydrates: a study based on genetic algorithm, P. Chaudhury, R. Saha and S.P. Bhattacharyya 270 (2001) 277

Algebraic approaches

Computational aspects of motional symmetry in nuclear magnetic resonance spectroscopy, J.H. Kristensen and I. Farnan 270 (2001) 109

Wavefunctions for highly excited and unbound states

Second-order Møller–Plesset perturbation theory for computing molecular-field splitting: application to the $S2p_{3/2}$ level in $C_2H_{2n+1}SF_5$, $n = 0$, 1, and 2, T. Karlsen, K.J. Børve and L.J. Sæthre 270 (2001) 55

Theoretical studies on the potential energy surface and rovibrational states for the electronic ground state of carbonyl sulfide, D. Xie, Y. Lu, D. Xu and G. Yan 270 (2001) 415

Spin states and magnetic interactions

Computational aspects of motional symmetry in nuclear magnetic resonance spectroscopy, J.H. Kristensen and I. Farnan 270 (2001) 109

Collisional and reactive molecular dynamics with non-frictional forces
On the capture cross-section for charge neutralization, recombination, photoassociation and other barrierless reactions, R.D. Levine 270 (2001) 129

Reactive molecular dynamics including dissipative processes
The dynamics of oxygen atom formation in the UV photodissociation of nitromethane, M.S. Park, K.-H. Jung, H.P. Upadhyaya and H.-R. Volpp 270 (2001) 133

Intramolecular dynamics
Theoretical studies on the potential energy surface and rovibrational states for the electronic ground state of carbonyl sulfide, D. Xie, Y. Lu, D. Xu and G. Yan 270 (2001) 415

Molecular dynamics of many particle systems and condensed phases
Nonstandard reaction kinetics: microscopic simulations of system with product removal, B. Nowakowski, A. Lemarchand and E. Nowakowska 270 (2001) 287

Quasiparticle dynamics (incl. excitons, polarons)
Towards proper parametrization in the exciton transfer and relaxation problem: dimer, V. Čápek, I. Barvík and P. Heřman 270 (2001) 141

Statistical computational methods (incl. Monte Carlo)
Photoisomerization of green fluorescent protein and the dimensions of the chromophore cavity, M.C. Chen, C.R. Lambert, J.D. Urgitis and M. Zimmer 270 (2001) 157
Nonstandard reaction kinetics: microscopic simulations of system with product removal, B. Nowakowski, A. Lemarchand and E. Nowakowska 270 (2001) 287

Dynamics of structures, lattices and macromolecular conformations
Photoisomerization of green fluorescent protein and the dimensions of the chromophore cavity, M.C. Chen, C.R. Lambert, J.D. Urgitis and M. Zimmer 270 (2001) 157
Electronic structure and chemical stabilization of C_{28} fullerene, Yu.N. Makurin, A.A. Sofronov, A.I. Gusev and A.L. Ivanovsky 270 (2001) 293
Potential lattice dynamical simulations of ice, S. Dong, Y. Wang and J. Li 270 (2001) 309

Non-equilibrium statistical mechanics
Towards proper parametrization in the exciton transfer and relaxation problem: dimer, V. Čápek, I. Barvík and P. Heřman 270 (2001) 141
Third-order transport properties of ions in electrostatic fields, A.D. Koutselos 270 (2001) 165
Inversion of the Kirkwood–Buff theory of solutions: application to binary systems, J.D. Pandey and R. Verma 270 (2001) 429
Non-equilibrium vibrational kinetics and 'hot atom' models in the recombination of hydrogen atoms on surfaces, E. Molinari and M. Tomellini 270 (2001) 439

Non-equilibrium thermodynamic and hydrodynamic theories
On the simplified state-to-state transport coefficients, E.V. Kustova 270 (2001) 177
On the accuracy of non-equilibrium transport coefficients calculation, E.V. Kustova, E.A. Nagnibeda and A. Chikhaoui 270 (2001) 459

Equilibrium statistical mechanics and thermodynamics
Orientation correlation of neopentane molecules in liquid state through available diffraction data, S. Sarkar, P.P. Nath and R.N. Joarder 270 (2001) 197

Experiment

Molecular spectroscopy
Understanding the solvatochromism of 10-hydroxybenzo[h]quinoline. An appraisal of a polarity calibrator, J. Carlos del Valle and J. Catalán 270 (2001) 1
Bifluorophors: molecular design and excitation energy transfer mechanism, I.A. Ronova, A.Yu. Kovalevsky, S.A. Siling, S.V. Shamshin, A.V. Grachev and O.Yu. Tsyganova 270 (2001) 99
On the capture cross-section for charge neutralization, recombination, photoassociation and other barrierless reactions, R.D. Levine 270 (2001) 129

-infrared
Tautomerism, hydrogen bonding and vibrational properties of 4-acetyl-3(5)-amino-5(3)-methylpyrazole, A. Szabó, V.I. Češljević and A. Kovács 270 (2001) 67

-UV
Ultraviolet spectroscopy and tautomerism of the DNA base guanine and its hydrate formed in a supersonic jet, F. Piuzzi, M. Mons, I. Dimicoli, B. Tardivel and Q. Zhao 270 (2001) 205
Lifetime measurements on the $c_4'^1\Sigma_u^+$, $v = 0$, 1 and 2 states of molecular nitrogen, W. Ubachs, R. Lang, I. Velchev, W.-Ü.L. Tchang-Brillet, A. Johansson, Z.S. Li, V. Lokhnygin and C.-G. Wahlström 270 (2001) 215

-visible
Excited electronic states and effect of vibronic-spin–orbit coupling on the radiative deactivation of the lowest triplet states of dioxins, E.A. Gastilovich, V.G. Klimenko, N.V. Korol'kova and G. Rauhut 270 (2001) 41

Photoelectron and Auger spectroscopy
Second-order Møller–Plesset perturbation theory for computing molecular-field splitting: application to the $S2p_{3/2}$ level in $C_2H_{2n+1}SF_5$, $n = 0$, 1, and 2, T. Karlsen, K.J. Børve and L.J. Sæthre 270 (2001) 55
On the structure and spectroscopic properties of free and protonated adamanzanes, V. Galasso 270 (2001) 79

Multiphoton ionization
The dynamics of oxygen atom formation in the UV photodissociation of nitromethane, M.S. Park, K.-H. Jung, H.P. Upadhyaya and H.-R. Volpp 270 (2001) 133

X-ray spectroscopy
Sulfur in different chemical surroundings – S K XANES spectra of sulfur-containing heterocycles and their quantum-chemically supported interpretation, B. Flemmig, H. Modrow, K.H. Hallmeier, J. Hormes, J. Reinhold and R. Szargan 270 (2001) 405

Electron impact spectroscopy
Imaging of orbital electron densities by electron momentum spectroscopy – a chemical interpretation of the binary (e,2e) reaction, C.E. Brion, G. Cooper, Y. Zheng, I.V. Litvinyuk and I.E. McCarthy 270 (2001) 13
Electron densities for the outer valence orbitals of pyridine: comparison of EMS measurements with near Hartree–Fock limit and density functional theory calculations, S. Tixier, W.A. Shapley, Y. Zheng, D.P. Chong, C.E. Brion, Z. Shi and S. Wolfe 270 (2001) 263
Ionic photofragmentation and photoionization of dimethyl ether in the VUV and soft X-ray regions (8.5–80 eV) – absolute oscillator strengths for molecular and dissociative photoionization, R. Feng, G. Cooper and C.E. Brion 270 (2001) 319
Ejection of cluster ions as a result of electron impact ionization of argon clusters, A.V. Malakhovskii 270 (2001) 471

Laser induced fluorescence
Dispersed fluorescence spectra of chlorobenzene, P. Imhof and K. Kleinermanns 270 (2001) 227
Hole-burning spectra of tropolone–$(CO_2)_n$ ($n = 1, 2$) van der Waals complexes and density functional study, K. Iwahashi, N. Yamamoto, T. Fukuchi, J. Furusawa and H. Sekiya 270 (2001) 333
Fluorescence of UO_2^{2+} in a non-complexing medium: $HClO_4/NaClO_4$ up to 10 M, I. Billard, A. Rustenholtz, L. Sémon and K. Lützenkirchen 270 (2001) 345

Ultrafast measurements
Towards proper parametrization in the exciton transfer and relaxation problem: dimer, V. Čápek, I. Barvík and P. Heřman 270 (2001) 141

Synchrotron spectroscopies
Observation of photon cascade emission in the Pr^{3+}-doped perovskite $KMgF_3$, I. Sokólska and S. Kück 270 (2001) 355
A study of the threshold photoelectron spectra and the photoionisation yield curves of the silicon tetrahalides, L. Cooper, L.G. Shpinkova, D.M.P. Holland and D.A. Shaw 270 (2001) 363
Sulfur in different chemical surroundings – S K XANES spectra of sulfur-containing heterocycles and their quantum-chemically supported interpretation, B. Flemmig, H. Modrow, K.H. Hallmeier, J. Hormes, J. Reinhold and R. Szargan 270 (2001) 405

Optoacoustic spectroscopy
Bulk rotational relaxation time and cross-section in gas mixtures, M. Terzić, D. Markushev and J. Jovanović-Kurepa 270 (2001) 383

Mass spectroscopy
"Plasma" effect in the formation of long lifetime Rydberg states, X. Hua, J. Bai and L. Wang 270 (2001) 93
A study of the threshold photoelectron spectra and the photoionisation yield curves of the silicon tetrahalides, L. Cooper, L.G. Shpinkova, D.M.P. Holland and D.A. Shaw 270 (2001) 363

X-ray, electron and neutron diffraction
Orientation correlation of neopentane molecules in liquid state through available diffraction data, S. Sarkar, P.P. Nath and R.N. Joarder 270 (2001) 197

Neutron scattering (inelastic and quasielastic)
Potential lattice dynamical simulations of ice, S. Dong, Y. Wang and J. Li 270 (2001) 309

Objects

Bulk systems

Gases
The dynamics of oxygen atom formation in the UV photodissociation of nitromethane, M.S. Park, K.-H. Jung, H.P. Upadhyaya and H.-R. Volpp 270 (2001) 133
Third-order transport properties of ions in electrostatic fields, A.D. Koutselos 270 (2001) 165
On the simplified state-to-state transport coefficients, E.V. Kustova 270 (2001) 177
Nonstandard reaction kinetics: microscopic simulations of system with product removal, B. Nowakowski, A. Lemarchand and E. Nowakowska 270 (2001) 287
On the accuracy of non-equilibrium transport coefficients calculation, E.V. Kustova, E.A. Nagnibeda and A. Chikhaoui 270 (2001) 459

Supersonic beams
Ultraviolet spectroscopy and tautomerism of the DNA base guanine and its hydrate formed in a supersonic jet, F. Piuzzi, M. Mons, I. Dimicoli, B. Tardivel and Q. Zhao 270 (2001) 205
Dispersed fluorescence spectra of chlorobenzene, P. Imhof and K. Kleinermanns 270 (2001) 227
Hole-burning spectra of tropolone–$(CO_2)_n$ ($n = 1, 2$) van der Waals complexes and density functional study, K. Iwahashi, N. Yamamoto, T. Fukuchi, J. Furusawa and H. Sekiya 270 (2001) 333

Liquid mixtures and solutions
Understanding the solvatochromism of 10-hydroxybenzo[h]quinoline. An appraisal of a polarity calibrator, J. Carlos del Valle and J. Catalán 270 (2001) 1
Fluorescence of UO_2^{2+} in a non-complexing medium: $HClO_4/NaClO_4$ up to 10 M, I. Billard, A. Rustenholtz, L. Sémon and K. Lützenkirchen 270 (2001) 345
Inversion of the Kirkwood–Buff theory of solutions: application to binary systems, J.D. Pandey and R. Verma 270 (2001) 429

Crystals
Towards proper parametrization in the exciton transfer and relaxation problem: dimer, V. Čápek, I. Barvík and P. Heřman 270 (2001) 141
Theoretical investigation on $BaTiO_3$ with periodic density functional theory BLYP method, Z.-X. Chen, C.-G. Liu, Y. Chen and Y.-S. Jiang 270 (2001) 253
Potential lattice dynamical simulations of ice, S. Dong, Y. Wang and J. Li 270 (2001) 309
Observation of photon cascade emission in the Pr^{3+}-doped perovskite $KMgF_3$, I. Sokólska and S. Kück 270 (2001) 355

Complex fluids
Orientation correlation of neopentane molecules in liquid state through available diffraction data, S. Sarkar, P.P. Nath and R.N. Joarder 270 (2001) 197

Polymers
Bifluorophors: molecular design and excitation energy transfer mechanism, I.A. Ronova, A.Yu. Kovalevsky, S.A. Siling, S.V. Shamshin, A.V. Grachev and O.Yu. Tsyganova 270 (2001) 99
Theoretical investigation of the role of π–π interactions for the stability of phenylene ethynylene aggregates, M. Pickholz and S. Stafström 270 (2001) 245
An investigation of keto–enol tautomerism in *N*-vinyl-2-, and 3-pyrrolidinones using ab initio and density functional theory calculations, H. Yekeler 270 (2001) 391

Surfaces
Non-equilibrium vibrational kinetics and 'hot atom' models in the recombination of hydrogen atoms on surfaces, E. Molinari and M. Tomellini 270 (2001) 439

Plasmas
"Plasma" effect in the formation of long lifetime Rydberg states, X. Hua, J. Bai and L. Wang 270 (2001) 93
Third-order transport properties of ions in electrostatic fields, A.D. Koutselos 270 (2001) 165

Microscopic and mesoscopic systems

Single atoms, molecules and assemblies (incl. biological)
Ultraviolet spectroscopy and tautomerism of the DNA base guanine and its hydrate formed in a supersonic jet, F. Piuzzi, M. Mons, I. Dimicoli, B. Tardivel and Q. Zhao 270 (2001) 205
An investigation of keto–enol tautomerism in *N*-vinyl-2-, and 3-pyrrolidinones using ab initio and density functional theory calculations, H. Yekeler 270 (2001) 391

Molecules (neutral and ionic)
Bifluorophors: molecular design and excitation energy transfer mechanism, I.A. Ronova, A.Yu. Kovalevsky, S.A. Siling, S.V. Shamshin, A.V. Grachev and O.Yu. Tsyganova 270 (2001) 99
Sulfur in different chemical surroundings – S K XANES spectra of sulfur-containing heterocycles and their quantum-chemically supported interpretation, B. Flemmig, H. Modrow, K.H. Hallmeier, J. Hormes, J. Reinhold and R. Szargan 270 (2001) 405

-diatomic
On the simplified state-to-state transport coefficients, E.V. Kustova 270 (2001) 177
Lifetime measurements on the $c_4'^1\Sigma_u^+$, $v = 0$, 1 and 2 states of molecular nitrogen, W. Ubachs, R. Lang, I. Velchev, W.-Ü.L. Tchang-Brillet, A. Johansson, Z.S. Li, V. Lokhnygin and C.-G. Wahlström 270 (2001) 215
On the accuracy of non-equilibrium transport coefficients calculation, E.V. Kustova, E.A. Nagnibeda and A. Chikhaoui 270 (2001) 459

-small polyatomics
Imaging of orbital electron densities by electron momentum spectroscopy – a chemical interpretation of the binary (e,2e) reaction, C.E. Brion, G. Cooper, Y. Zheng, I.V. Litvinyuk and I.E. McCarthy 270 (2001) 13

Second-order Møller–Plesset perturbation theory for computing molecular-field splitting: application to the $S2p_{3/2}$ level in $C_2H_{2n+1}SF_5$, $n = 0$, 1, and 2, T. Karlsen, K.J. Børve and L.J. Sæthre 270 (2001) 55
Tautomerism, hydrogen bonding and vibrational properties of 4-acetyl-3(5)-amino-5(3)-methylpyrazole, A. Szabó, V.I. Češljević and A. Kovács 270 (2001) 67
Ionic photofragmentation and photoionization of dimethyl ether in the VUV and soft X-ray regions (8.5–80 eV) – absolute oscillator strengths for molecular and dissociative photoionization, R. Feng, G. Cooper and C.E. Brion 270 (2001) 319
A stu dy of the threshold photoelectron spectra and the photoionisation yield curves of the silicon tetrahalides, L. Cooper, L.G. Shpinkova, D.M.P. Holland and D.A. Shaw 270 (2001) 363
Theoretical studies on the potential energy surface and rovibrational states for the electronic ground state of carbonyl sulfide, D. Xie, Y. Lu, D. Xu and G. Yan 270 (2001) 415

-aromatics
Dispersed fluorescence spectra of chlorobenzene, P. Imhof and K. Kleinermanns 270 (2001) 227
Electron densities for the outer valence orbitals of pyridine: comparison of EMS measurements with near Hartree–Fock limit and density functional theory calculations, S. Tixier, W.A. Shapley, Y. Zheng, D.P. Chong, C.E. Brion, Z. Shi and S. Wolfe 270 (2001) 263

-other large
Excited electronic states and effect of vibronic-spin–orbit coupling on the radiative deactivation of the lowest triplet states of dioxins, E.A. Gastilovich, V.G. Klimenko, N.V. Korol'kova and G. Rauhut 270 (2001) 41
On the structure and spectroscopic properties of free and protonated adamanzanes, V. Galasso 270 (2001) 79
Electronic structure and chemical stabilization of C_{28} fullerene, Yu.N. Makurin, A.A. Sofronov, A.I. Gusev and A.L. Ivanovsky 270 (2001) 293

Molecular aggregates
On the size extensivity of second-order Møller–Plesset perturbation theory based on a perfectly-paired generalized valence bond reference wavefunction, M. Sejpal and R.P. Messmer 270 (2001) 237
Structure and vibrational spectroscopy of halide ion hydrates: a study based on genetic algorithm, P. Chaudhury, R. Saha and S.P. Bhattacharyya 270 (2001) 277

-van der Waals molecules
Rapid estimation of the electronic correlation energies for van der Waals complexes, J. Wei, S. Zhuo and G. Ju 270 (2001) 31
Hole-burning spectra of tropolone–$(CO_2)_n$ ($n = 1, 2$) van der Waals complexes and density functional study, K. Iwahashi, N. Yamamoto, T. Fukuchi, J. Furusawa and H. Sekiya 270 (2001) 333

-clusters
Structure and vibrational spectroscopy of halide ion hydrates: a study based on genetic algorithm, P. Chaudhury, R. Saha and S.P. Bhattacharyya 270 (2001) 277
Potential lattice dynamical simulations of ice, S. Dong, Y. Wang and J. Li 270 (2001) 309

Ejection of cluster ions as a result of electron impact ionization of argon clusters, A.V. Malakhovskii 270 (2001) 471

Quasiparticles (incl. excitons)
Towards proper parametrization in the exciton transfer and relaxation problem: dimer, V. Čápek, I. Barvík and P. Heřman 270 (2001) 141

Proteins
Photoisomerization of green fluorescent protein and the dimensions of the chromophore cavity, M.C. Chen, C.R. Lambert, J.D. Urgitis and M. Zimmer 270 (2001) 157

Phenomena

Molecular structure
Rapid estimation of the electronic correlation energies for van der Waals complexes, J. Wei, S. Zhuo and G. Ju 270 (2001) 31
Tautomerism, hydrogen bonding and vibrational properties of 4-acetyl-3(5)-amino-5(3)-methylpyrazole, A. Szabó, V.I. Češljević and A. Kovács 270 (2001) 67
On the structure and spectroscopic properties of free and protonated adamanzanes, V. Galasso 270 (2001) 79
Orientation correlation of neopentane molecules in liquid state through available diffraction data, S. Sarkar, P.P. Nath and R.N. Joarder 270 (2001) 197
Theoretical investigation of the role of π–π interactions for the stability of phenylene ethynylene aggregates, M. Pickholz and S. Stafström 270 (2001) 245
Structure and vibrational spectroscopy of halide ion hydrates: a study based on genetic algorithm, P. Chaudhury, R. Saha and S.P. Bhattacharyya 270 (2001) 277
Hole-burning spectra of tropolone–$(CO_2)_n$ ($n = 1, 2$) van der Waals complexes and density functional study, K. Iwahashi, N. Yamamoto, T. Fukuchi, J. Furusawa and H. Sekiya 270 (2001) 333
An investigation of keto–enol tautomerism in *N*-vinyl-2-, and 3-pyrrolidinones using ab initio and density functional theory calculations, H. Yekeler 270 (2001) 391

Vibrations and rotations of molecules
Tautomerism, hydrogen bonding and vibrational properties of 4-acetyl-3(5)-amino-5(3)-methylpyrazole, A. Szabó, V.I. Češljević and A. Kovács 270 (2001) 67
Dispersed fluorescence spectra of chlorobenzene, P. Imhof and K. Kleinermanns 270 (2001) 227
Structure and vibrational spectroscopy of halide ion hydrates: a study based on genetic algorithm, P. Chaudhury, R. Saha and S.P. Bhattacharyya 270 (2001) 277
Theoretical studies on the potential energy surface and rovibrational states for the electronic ground state of carbonyl sulfide, D. Xie, Y. Lu, D. Xu and G. Yan 270 (2001) 415

Electronic structure and states
Imaging of orbital electron densities by electron momentum spectroscopy – a chemical interpretation of the binary (e,2e) reaction, C.E. Brion, G. Cooper, Y. Zheng, I.V. Litvinyuk and I.E. McCarthy 270 (2001) 13

Second-order Møller–Plesset perturbation theory for computing molecular-field splitting: application to the $S2p_{3/2}$ level in $C_2H_{2n+1}SF_5$, $n = 0$, 1, and 2, T. Karlsen, K.J. Børve and L.J. Sæthre 270 (2001) 55
Photoisomerization of green fluorescent protein and the dimensions of the chromophore cavity, M.C. Chen, C.R. Lambert, J.D. Urgitis and M. Zimmer 270 (2001) 157
Ultraviolet spectroscopy and tautomerism of the DNA base guanine and its hydrate formed in a supersonic jet, F. Piuzzi, M. Mons, I. Dimicoli, B. Tardivel and Q. Zhao 270 (2001) 205
Theoretical investigation on $BaTiO_3$ with periodic density functional theory BLYP method, Z.-X. Chen, C.-G. Liu, Y. Chen and Y.-S. Jiang 270 (2001) 253
Electron densities for the outer valence orbitals of pyridine: comparison of EMS measurements with near Hartree–Fock limit and density functional theory calculations, S. Tixier, W.A. Shapley, Y. Zheng, D.P. Chong, C.E. Brion, Z. Shi and S. Wolfe 270 (2001) 263
Electronic structure and chemical stabilization of C_{28} fullerene, Yu.N. Makurin, A.A. Sofronov, A.I. Gusev and A.L. Ivanovsky 270 (2001) 293
Observation of photon cascade emission in the Pr^{3+}-doped perovskite $KMgF_3$, I. Sokólska and S. Kück 270 (2001) 355
Sulfur in different chemical surroundings – S K XANES spectra of sulfur-containing heterocycles and their quantum-chemically supported interpretation, B. Flemmig, H. Modrow, K.H. Hallmeier, J. Hormes, J. Reinhold and R. Szargan 270 (2001) 405

Electric and magnetic properties
On the structure and spectroscopic properties of free and protonated adamanzanes, V. Galasso 270 (2001) 79

Molecular interactions
Rapid estimation of the electronic correlation energies for van der Waals complexes, J. Wei, S. Zhuo and G. Ju 270 (2001) 31
On the capture cross-section for charge neutralization, recombination, photoassociation and other barrierless reactions, R.D. Levine 270 (2001) 129
On the size extensivity of second-order Møller–Plesset perturbation theory based on a perfectly-paired generalized valence bond reference wavefunction, M. Sejpal and R.P. Messmer 270 (2001) 237
Hole-burning spectra of tropolone–$(CO_2)_n$ ($n = 1, 2$) van der Waals complexes and density functional study, K. Iwahashi, N. Yamamoto, T. Fukuchi, J. Furusawa and H. Sekiya 270 (2001) 333

Spectral bandshapes and intensities
Ionic photofragmentation and photoionization of dimethyl ether in the VUV and soft X-ray regions (8.5–80 eV) – absolute oscillator strengths for molecular and dissociative photoionization, R. Feng, G. Cooper and C.E. Brion 270 (2001) 319

Energy transfer processes
Bifluorophors: molecular design and excitation energy transfer mechanism, I.A. Ronova, A.Yu. Kovalevsky, S.A. Siling, S.V. Shamshin, A.V. Grachev and O.Yu. Tsyganova 270 (2001) 99

Fluorescence of UO_2^{2+} in a non-complexing medium: $HClO_4/NaClO_4$ up to 10 M, I. Billard, A. Rustenholtz, L. Sémon and K. Lützenkirchen 270 (2001) 345
Bulk rotational relaxation time and cross-section in gas mixtures, M. Terzić, D. Markushev and J. Jovanović-Kurepa 270 (2001) 383

Molecular photophysical processes
Understanding the solvatochromism of 10-hydroxybenzo[h]quinoline. An appraisal of a polarity calibrator, J. Carlos del Valle and J. Catalán 270 (2001) 1
Excited electronic states and effect of vibronic-spin–orbit coupling on the radiative deactivation of the lowest triplet states of dioxins, E.A. Gastilovich, V.G. Klimenko, N.V. Korol'kova and G. Rauhut 270 (2001) 41
Lifetime measurements on the $c_4'^1\Sigma_u^+$, $v = 0$, 1 and 2 states of molecular nitrogen, W. Ubachs, R. Lang, I. Velchev, W.-Ü.L. Tchang-Brillet, A. Johansson, Z.S. Li, V. Lokhnygin and C.-G. Wahlström 270 (2001) 215
Ionic photofragmentation and photoionization of dimethyl ether in the VUV and soft X-ray regions (8.5–80 eV) – absolute oscillator strengths for molecular and dissociative photoionization, R. Feng, G. Cooper and C.E. Brion 270 (2001) 319
A study of the threshold photoelectron spectra and the photoionisation yield curves of the silicon tetrahalides, L. Cooper, L.G. Shpinkova, D.M.P. Holland and D.A. Shaw 270 (2001) 363
Bulk rotational relaxation time and cross-section in gas mixtures, M. Terzić, D. Markushev and J. Jovanović-Kurepa 270 (2001) 383

Photochemistry
The dynamics of oxygen atom formation in the UV photodissociation of nitromethane, M.S. Park, K.-H. Jung, H.P. Upadhyaya and H.-R. Volpp 270 (2001) 133

Intramolecular dynamics
On the capture cross-section for charge neutralization, recombination, photoassociation and other barrierless reactions, R.D. Levine 270 (2001) 129

-vibrational energy redistribution (incl. vibrational dissociation)
On the simplified state-to-state transport coefficients, E.V. Kustova 270 (2001) 177

Luminescence spectra, yields and lifetimes
Fluorescence of UO_2^{2+} in a non-complexing medium: $HClO_4/NaClO_4$ up to 10 M, I. Billard, A. Rustenholtz, L. Sémon and K. Lützenkirchen 270 (2001) 345
Observation of photon cascade emission in the Pr^{3+}-doped perovskite $KMgF_3$, I. Sokólska and S. Kück 270 (2001) 355

Multiphoton phenomena
Bulk rotational relaxation time and cross-section in gas mixtures, M. Terzić, D. Markushev and J. Jovanović-Kurepa 270 (2001) 383

Reactions (incl. dissociation)
On the capture cross-section for charge neutralization, recombination, photoassociation and other barrierless reactions, R.D. Levine 270 (2001) 129

-collisional
Nonstandard reaction kinetics: microscopic simulations of system with product removal, B. Nowakowski, A. Lemarchand and E. Nowakowska 270 (2001) 287

Proton and hydrogen atom transfer
Understanding the solvatochromism of 10-hydroxybenzo[h]quinoline. An appraisal of a polarity calibrator, J. Carlos del Valle and J. Catalán 270 (2001) 1

Ionization (incl. Rydberg states)
"Plasma" effect in the formation of long lifetime Rydberg states, X. Hua, J. Bai and L. Wang 270 (2001) 93
A study of the threshold photoelectron spectra and the photoionisation yield curves of the silicon tetrahalides, L. Cooper, L.G. Shpinkova, D.M.P. Holland and D.A. Shaw 270 (2001) 363

Molecular motion (incl. diffusive)
Computational aspects of motional symmetry in nuclear magnetic resonance spectroscopy, J.H. Kristensen and I. Farnan 270 (2001) 109
Third-order transport properties of ions in electrostatic fields, A.D. Koutselos 270 (2001) 165

Surface chemical physics
Non-equilibrium vibrational kinetics and 'hot atom' models in the recombination of hydrogen atoms on surfaces, E. Molinari and M. Tomellini 270 (2001) 439

-surface reactions
Non-equilibrium vibrational kinetics and 'hot atom' models in the recombination of hydrogen atoms on surfaces, E. Molinari and M. Tomellini 270 (2001) 439

-catalysis
Non-equilibrium vibrational kinetics and 'hot atom' models in the recombination of hydrogen atoms on surfaces, E. Molinari and M. Tomellini 270 (2001) 439

Thermodynamic and transport properties
Third-order transport properties of ions in electrostatic fields, A.D. Koutselos 270 (2001) 165
On the simplified state-to-state transport coefficients, E.V. Kustova 270 (2001) 177
On the accuracy of non-equilibrium transport coefficients calculation, E.V. Kustova, E.A. Nagnibeda and A. Chikhaoui 270 (2001) 459

Structure of solids, liquids and gases
Orientation correlation of neopentane molecules in liquid state through available diffraction data, S. Sarkar, P.P. Nath and R.N. Joarder 270 (2001) 197

Molecular self-assembly and -organization
Theoretical investigation of the role of π–π interactions for the stability of phenylene ethynylene aggregates, M. Pickholz and S. Stafström 270 (2001) 245
